

Personal thoughts about IoT work in IETF

Alexey Melnikov <alexey.melnikov@isode.com>

Problem statement

- IETF does IoT related work in multiple IETF WGs in multiple Areas.
- But how do we make it easily findable by newcomers or people outside of IETF?

What we already do

- IoT web page on [www.ietf.org](https://www.ietf.org/topics/iot/): <https://www.ietf.org/topics/iot/>
- IoT Directorate: <https://datatracker.ietf.org/group/iotdir/about/>

What can be improved?

- IoT web page on www.ietf.org
 - Make sure the list of related work / working groups remains current
 - IoT tag in datatracker and expose this info?
- IoT Directorate
 - anchored at Internet Area ==> sends wrong marketing signal
 - Make it a GEN Area Directorate?
 - Public meetings of the Directorate?
- IoT DISPATCH-like WG
- IoT czar :-) ?
